

AIDE

Android Wear apps with AIDE

appfour GmbH

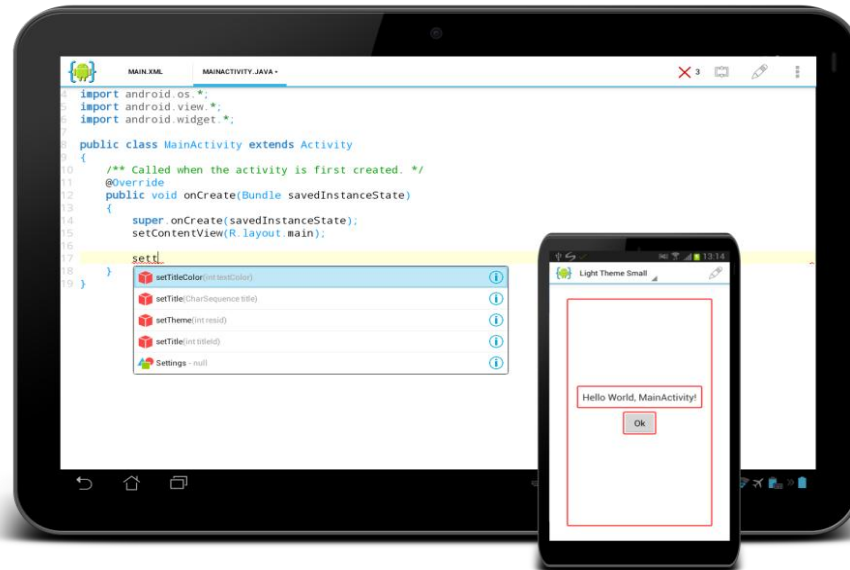

Dr. Dennis Strein

www.android-ide.com

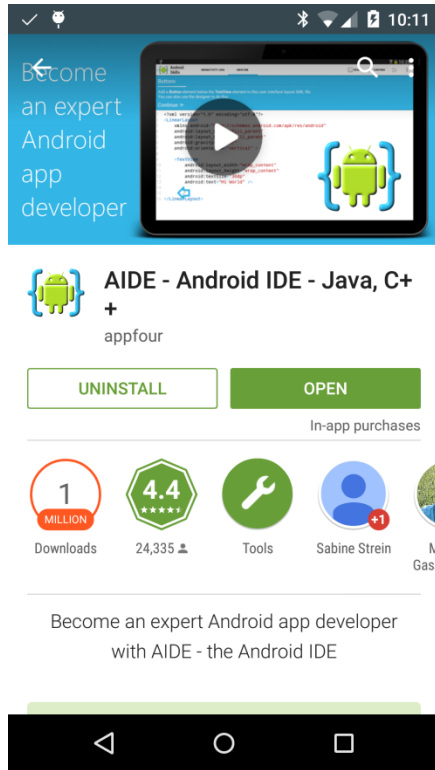

AIDE...

- ...is the **Android Integrated Development Environment**
- Develop apps **for** Android **on** Android

AIDE on Google Play

- 2.4 millions downloads
- Free for small projects
- Paid premium features & interactive courses

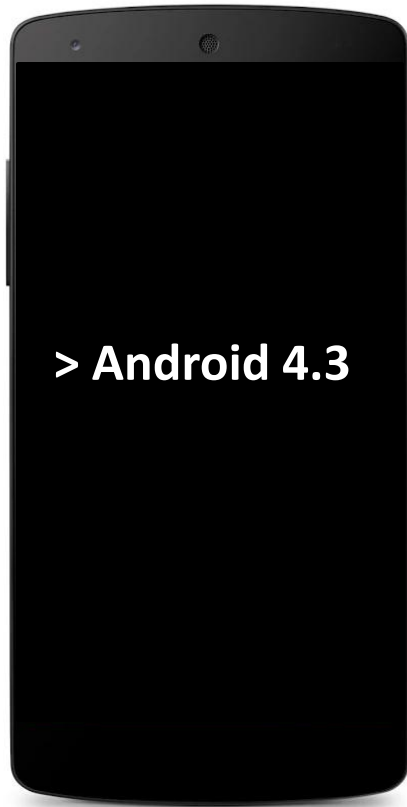

AIDE & Android Wear

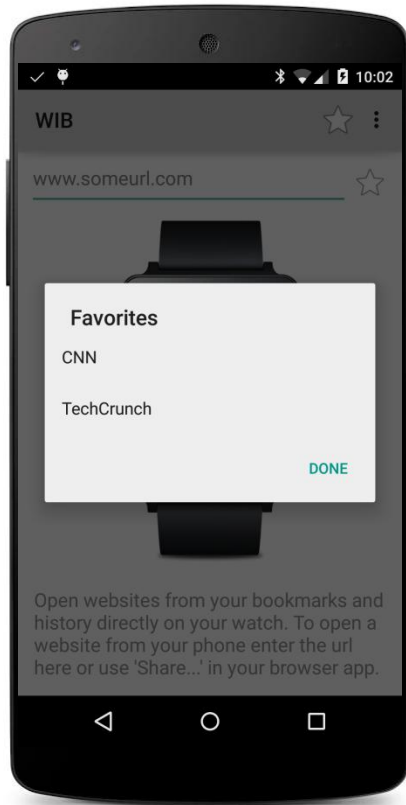

- AIDE now supports developing apps for Android Wear (smartwatches)
- In this talk: Technical introduction & DEMO

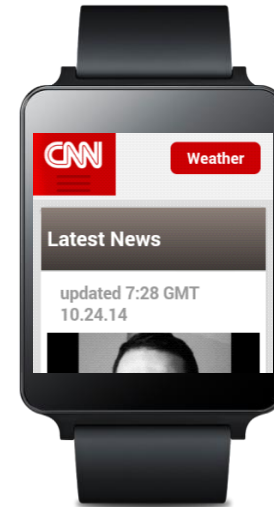

Android Wear

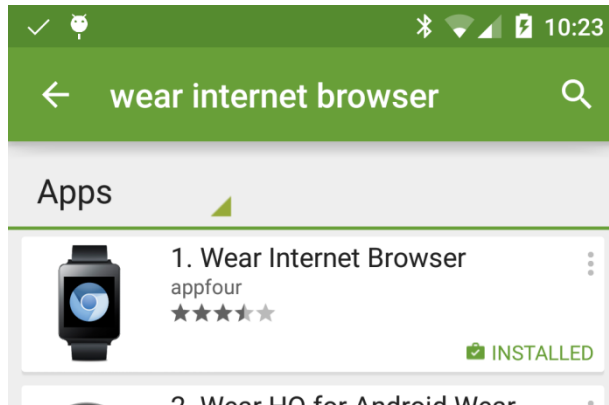

Android Wear Apps

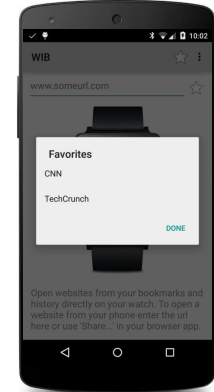

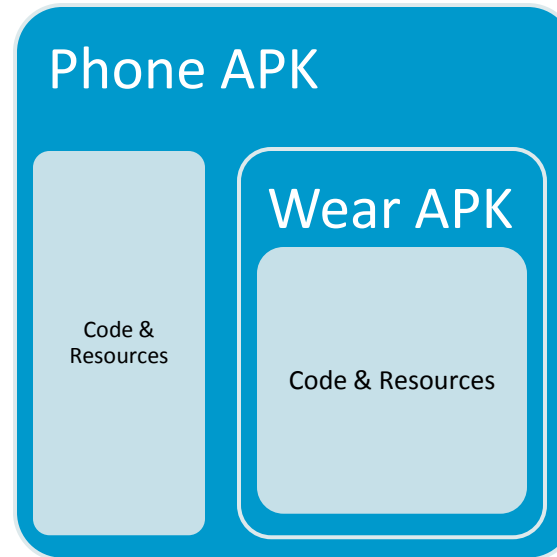

**e.g. „Wear
Internet
Browser“ App**

Wear App Deployment

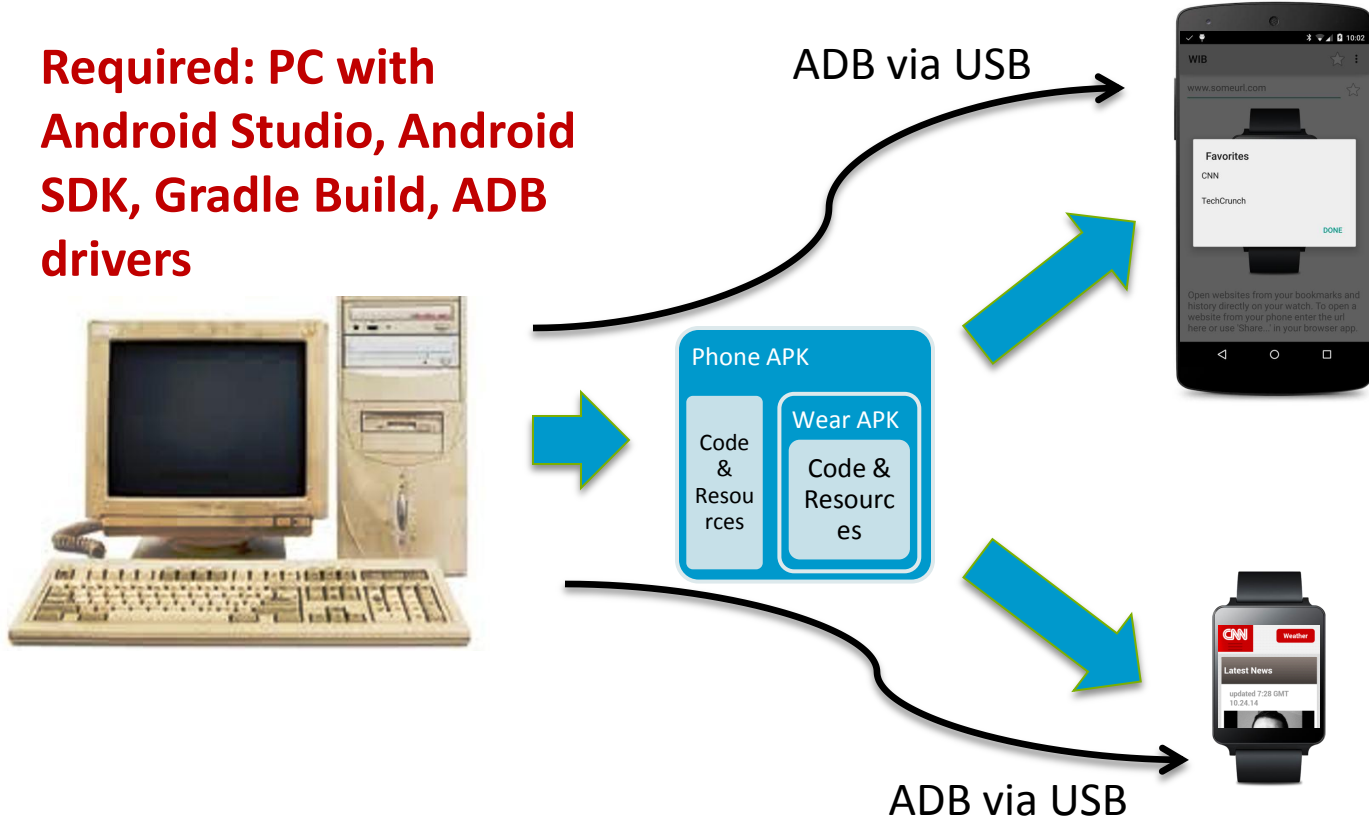

Google Play

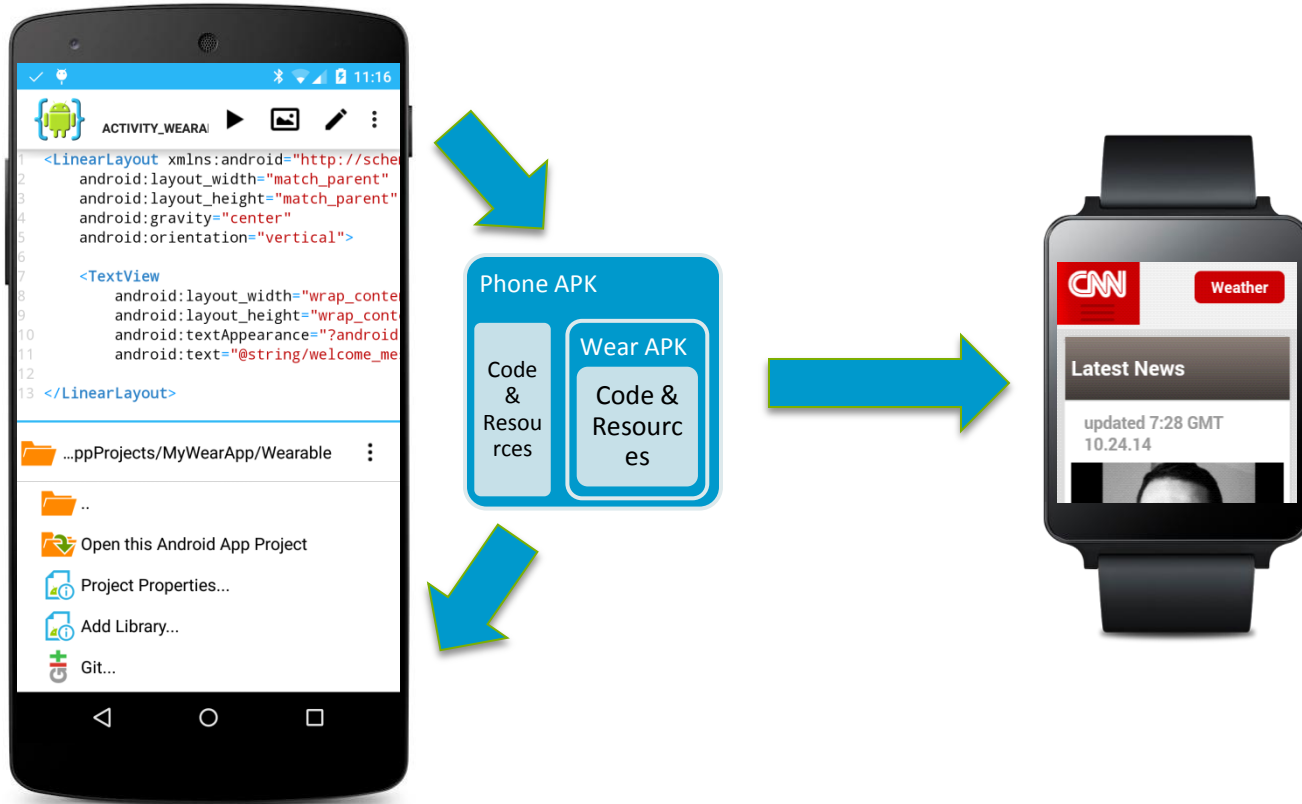

Wear Development with PC

**Required: PC with
Android Studio, Android
SDK, Gradle Build, ADB
drivers**

Wear Development with AIDE

**Required:
AIDE**

Gradle

```
dependencies {  
    compile fileTree(dir: 'libs', include: ['*.jar'])  
    compile 'com.google.android.gms:play-services-wearable:+'  
    wearApp project(':wear')  
}
```

- AIDE uses Gradle project format for wear apps
- Compatibility between Android Studio & AIDE
